

cellfield

a unique approach for reading disorders

The breakthrough scientifically proven intervention

Does your child have:

- “ Poor reading or comprehension skills?
- “ Concentration, attention and retention difficulties?
- “ Tiredness or discomfort induced by reading?

They may have a reading disorder that needs intervention.

After just 2 weeks of **cellfield**, the average gains made by students include an increase in 2 grade levels in their word attack skills during reading*.

Free INFORMATION NIGHT

*Find out more now...cellfield can help your child
with new reading skills and confidence!*

*Join Robyn Stephen, Principal Speech Pathologist, to gain an understanding of how the brain reads and how **cellfield** rewires the brain for reading.*
